

Curriculum Vitae

Tjin Au Yeung — Front-end Developer

I am a Bachelor of Engineering (B. Eng) turned developer and teacher with 2+ years of experience building websites and an eye for good UI / UX.

EXPERIENCE

Usabilla

March 2016 — now

I work as a Front-end Developer on diverse projects such as our dashboard and filters in our SPA, the internal theme-editor, the themes-api and refactoring of the scss of our themes.

I participated in a design sprint that resulted in a design solution for our theming feature. Together with my team we convinced the company to implement this solution and start automating the manual process of theming. This resulted in the company giving green light to building the theme editor.

Codaisseur Academy

March 2016 — April 2017

After graduating the Academy I was asked to give an introductory class on HTML & CSS and an advanced class on SASS to new participants of the program. During my time as a teacher I wrote and improved the course material in the online reader and created small coding exercises.

Taste of Code

March 2016

I worked as a coding coach at several Taste of Code events at e.g. NOS. The goal of the event was to introduce beginners to code by building a simple game using web technologies. As a coach I helped guide participants along the course and exercises.

Freelance

2015 — now

I worked as a freelance web developer and graphic designer for several clients i.e. Fritzkola, de Tolhuistuin and IFAC festival (International Festival of Art & Construction).

EDUCATION

Codaisseur Academy

Full-stack Web Development

2016 — now

I followed a traineeship for full stack web development at Codaisseur. The curriculum consisted of Ruby on Rails and React/Redux during the first part of the traineeship, followed by monthly recurring classes on a range of development topics.

Hogeschool van Amsterdam

Build Environment
